W=600 mm and W=800 mm DYNAmax Series Free Standing Server Cabinets

DYNAmax Series High Quality Server Enclosures, provide a secure environment for the server and storage equipment with efficient ventilation, heavy duty construction to maximise the heavy duty requirements of server equipment, flexible door options, flat or curved mesh with either 70% airflow, for large sizes split side panels to help engineers when gaining access to equipment, flexible fan modules which allows "hot swapping" from the top cover for maintenance, 12U 600x1000 cabinet is ideal for under-desk applications or where space is limited.

Whilst the product gives maximum performance on server infrastructure requirements, in parallel provides a economic solution when compared to its quality, which is based on high quality fully automated production.

The DYNAmax 600 wide is available in 6 heights from 12U through to 47U, the 800 wide is available with 4 heights 36U, 42U, 45U and 47U. Each cabinet is supplied as standard with a 70% perforated curved mesh front door, 4 point locking and wardrobe style rear door 70% perforated steel mesh rear door, lockable lift off steel side panels, above 36U side panels are supplied as 2 part for easy handling.

The wide product height portfolio meets the majority of U requirements for server infrastructure requirements, (special specific sizes can be provided for project quantities).

DYNAmax Series has a professional aesthetic look with decorative curved perforated mesh front door with swing handle and 4 point locking an option of color of RAL 9005 Black and RAL 7035 Light Grey, with fine wrinkle soft touch paint, providing a professional appearance for the server room.

Fully stocked product portfolio, being delivered a single piece assembled product, as shipping configuration the heavy duty adjustable feet and a heavy duty castor set are included.

FAMILY

Construction details:

Main profile, framework, top/bottom cases:

Manufactured from multi folded automated bending technology corner closed profile system, which provides a heavy duty structure resulting high load capacity of: 1000 kgs dynamic load.

Monoblock multi folded top and bottom cases, fixed to the framework with fixing hardware, providing strength and rigidity.

The top cover has a perforated ventilation panel to allow integration of fan modules. Fan module installation is from roof the advantage of this system is, the fan unit needs maintenance or replacement there is no need to remove installed equipment.

Lande Server Cabinet fan module unit access is from the roof which means no interference with installed equipment or cabling inside the cabinet. Additionally there is cable entry panel in the top cover with sliding rubber edged panel.

Bottom case integrated with wide cable entry point provides maximum versatility. The rubber edged sliding mechanism on the cable entry point at bottom with $w=350\text{ mm} \times d=250\text{ mm}$ allows large cabling infrastructure applications. Rubber edged sliding mechanism max cable entry opening is $w=350 \times d=150\text{ mm}$ after inserting the cables, the rubber edged mechanism holds the cables in parallel protecting the cabinet from dust entry.

The Lande DYNAmax W:800 mm wide cabinet bottom case, there is two additional 60x300 mm 2 pcs brushed cable entry points at sides which provides much needed cable entry space for 800 mm wide server cabinets.

Top cover integrated with wide cable entry point provides maximum versatility. The rubber edged sliding mechanism on the cable entry point at bottom with $w=175\text{ mm} \times d=250\text{ mm}$ allows large cabling infrastructure applications. On rubber edged sliding mechanism max cable entry opening is $w=175 \times d=150\text{ mm}$. After inserting the cables, the rubber edged mechanism holds and fixes the cables in parallel protecting the cabinet from dust entry.

The DYNAmax W800 mm wide cabinet top cover, there is two 60x300 mm brushed cable entry points, one each side.

Construction details:

Access to enclosure: front door monoblock 70% perforated curved mesh door with four point locking swing handled lock, options of RAL 7035 Light Grey or RAL 9005 Black Colors.

Front door opening direction is set right to left, but option to switch to left to right on site with easily switchable hinge system. The hinge system is quick release operating version, which allows you to remove the whole front door from cabinet in seconds. Alternative doors steel, glass are available for customer selection. Please see door options at the end of each product size.

**12U 600x1000 mm under-desk usage mini server cabinet has single curved 70% perforated metal front door with single point handled locking system.

Side panels are lockable and removable with barrel style lock, multi-folded bending technology with 8 fold bending provides the strength and rigidity. Easy mechanical locking of panel to main frame with snap capture system allows easy attachment of panels and easy removal in seconds while installation in process.

The 12U, 26U and 36U side panels are single piece due to its size; 42U, 45U and 47U side panels are 2 parts split horizontally for easy handling during removal or installation process.

Rear doors are in standard 70% perforated split rear door, with handled locking 3 point locking system.

**12U 600x1000 mm under-desk usage mini server cabinet has single flat 70% perforated metal rear door with single point handled locking system.

Multi-folded bending technology with 8 fold bending provides the rigidity in rear doors.

Door options, there are various designs. Please see rear door options at the end of each product size.

All design features provide 4 way access to your enclosure and equipment, easy access to enclosure and equipment for infrastructure installations and maintenance needs.

Construction details:

19" rails of Lande DYNAmax Series Free Standing Server Cabinets has automated silk-screen U numbering, from top to bottom or bottom to top to save time when installing equipment. 19" rails are 4 fold bending for strength. 2,0 mm thickness provides the high load capacities. The 19" rails are made of steel with 8-12 micron zinc plating for corrosion resistance. 19" rails are adjustable in depth for easy adjustment just ease the screws and slide them in the channels on the top/bottom chassis depth bends.

Cabinet structure, side horizontal depth support bars add to the strength of the cabinet. They are 2,0 mm thickness material with 8-12 micron zinc plating. The 12U and 26U 600x1000 has 2 left - 2 right Z side depth support bars. 36U 600x1000/1200 has 3 left - 3 right Z side depth support bars. 42U, 45U and 47U 600x1000/1200 has 4 left - 4 right Z side depth support bars.

W800 mm segment 36U, 42U, 45U and 47U 800x1000 and W800 mm segment 42U, 45U and 47U, 800x1200 has 4 left, 4 right side depth support bars L and Z shaped.

Our Recommended Products

Environmental Monitoring and Management System

A full range of Environmental Management System modules are available, standalone or Networked to allow local or remote monitoring which allows Administrators to effectively manage your valuable assets, options for Camera's, Smoke sensors, Temperature and Humidity sensors, Moisture Sensors, and access sensors.

Advantages, Remote monitoring of multiple sites, High security and internal audit capability, Corrective and preventive actions, Instant and retrospective reporting and analysis.

Access Control Systems

A full of Access Control and Locking systems available for to whole Lande range, from round key locked single point, swing lock three-point locking, combination locks, Keypad locking, RFID Card reader locking, Finger print readers and Retina (Eye) Reader Locking.

If integrated with Lande EMS systems, remote monitor locking can be achieved.

Power Distribution Unit

A complete range of Power Distribution Units are available from Basic economical units or full remote monitoring intelligent Units, IEC320 C13, BS 3pin UK type, DIN 49440 Schuko, 16A Breaker and Surge protection, 19" Horizontal and Vertical units either basic on/off switch to intelligent units with built in network point to allow multiple remote monitoring of various sites are available.
